Data set includes sale data so that order dates are specified in 2015, 2016, 2017 and 2018. The total number of records is about 9994 according to the number of orders overs the last 4 years.

Year	Number of orders
2015	1993
2016	2102
2017	2587
2018	3312

Data schema

Column name	Type	Description
category	string	
city	string	
country	string	
customer_name	string	
discount	decimal	
order_date	date	
order_id	string	
postal_code	integer	
manufacturer	string	

Column name	Type	Description
product_name	string	
profit	decimal	
quantity	integer	
region	string	
sales	decimal	
segment	string	
ship_date	date	
ship_mode	string	
state	string	
sub_category	string	

Column: category - string

Column is of type string and doesn't have any null value.

Sub-category, product_name, manufacturer, and segment are classified in the same hierarchy of product. These columns don't have null values or any outliers. The dataset is pre-processed.

Columns: Country-Region-State-City-Postal code

Columns are type of string in data set and geographical type in Tableau. They don't have any null values or outliers. It's data of United States classified in 4 regions of all american states.

Columns: customer_name, order_date, order_id, ship_mode and ship_date

These are dimension columns related to orders. These columns don't have null values or any outliers. The dataset is pre-processed.

Columns: sales, discount, profit, quantity

These are measure columns related to orders. These columns don't have null values or any outliers. The dataset is pre-processed.
